PROFESSIONAL SUMMARY

PGDM (Business Analytics) candidate with a strong foundation in data analysis, SQL, and business problem-solving. Experienced in identifying trends, analyzing requirements, and translating data insights into actionable recommendations. Skilled in stakeholder collaboration, process analysis, and supporting data-driven decision-making. Proficient in SQL, Python, Power BI, and Excel, with a strong understanding of data quality, documentation, and reporting best practices. Eager to apply analytical skills in a Technology Business Analyst role supporting strategic objectives.

CORE COMPETENCIES

Business Requirements Analysis | Stakeholder Collaboration | Exception Analysis | SQL & Data Querying | Process & Operational Design | Feasibility Studies | Data Visualization | Change Management Support | JIRA | Traceability Matrix | Business Case Support | Report Creation

TECHNICAL SKILLS

- Data Analysis & Visualization: Power BI, Tableau, Excel (PivotTables, VLOOKUP, Charts)
- Databases & Querying: SQL, MySQL — including exception analysis and data validation
- Programming & Analysis: Python (Pandas, NumPy, Matplotlib, Scikit-learn)
- Project & Issue Tracking: JIRA
- Data Preparation: Data cleaning, transformation, validation, documentation
- Tools: MS Excel, PowerPoint, Word

PROFESSIONAL EXPERIENCE

Data Analytics Intern – Enigma Holdings 2025

Project: Stock Clustering by Behaviour

- Identified and analysed business problems related to stock behaviour patterns, translating findings into structured data requirements aligned with investment decision-making objectives.
- Collected, cleaned, and prepared financial data for analysis using Python and Pandas, ensuring data quality and consistency in line with documentation best practices.
- Conducted exception analysis by identifying anomalies and outliers in stock returns, volatility, and RSI indicators, escalating findings appropriately.
- Collaborated with stakeholders to present insights in clear visualisations and reports, supporting data-driven investment recommendations.
- Defined variable relationships to segment Nifty 50 stocks using K-Means, DBSCAN, and Hierarchical Clustering, supporting feasibility of proposed analytical solutions.
- Maintained thorough documentation of analysis steps, adhering to ethical data usage and confidentiality standards.

PROJECTS

Hybrid Gift Shop Website 2024

- Digitised a manual sales process using a database-driven web application, identifying business requirements and translating them into an operational solution.
- Structured and analysed sales data to support business insights and process improvement.

Movie Mania OTT Platform 2023

- Developed a database-backed streaming platform with structured user data, applying SQL for data modelling and querying.
- Analysed user preferences and content engagement data to support platform optimisation decisions.

EDUCATION

PGDM – Business Analytics (Pursuing) 2026

Dr. D. Y. Patil B-School, Pune

BCA – Bachelor of Computer Applications 2024 | 72%

Christ College, Pune

CERTIFICATIONS

- Microsoft Office Excel Expert Specialist – April 2025
- Data Analytics – Accenture (FORAGE) – September 2024
- Microsoft SQL Server 2022 Essential Training – LinkedIn – 2024

KEY ATTRIBUTES (BARCLAYS VALUES ALIGNMENT)

- Respect & Integrity: Maintained ethical data usage practices and documentation standards throughout all projects.
- Service & Excellence: Consistently driven to deliver high-quality, accurate analysis with continuous improvement mindset.
- Stewardship: Takes responsibility for data quality and strengthening analytical controls in all work deliverables.
